## TODAY'S TOPICS:

- NEW SSH CERTS
  - DISASTER
  - HEALTHCARE
  - OIL & GAS
  - PORT SAFETY
- OSHA PUBLIC SECTOR CERTS
- CONTRACT CLASSES
- CONSULTING SERVICES

*Serving the community...  
one organization, one project,  
one person at a time.*

# TABLE OF CONTENTS

## Certification Programs

Public Sector Safety and Health .....	4
Accident Investigation .....	4
 Specialist in Safety & Health .....	4
 Certified Safety & Health Official .....	5
 Safety, Health & Environmental Professional .....	6
 Master Certification .....	6

## On-Site Services

Contract Training.....	7
Safety & Health Consulting .....	7

## OSHA Course Listings

OSHA 500	Trainer Course in OSHA Standards for Construction .....	8
OSHA 501	Trainer Course in OSHA Standards for General Industry .....	8
OSHA 502	Update for Construction Industry Outreach Trainers .....	8
OSHA 503	Update for General Industry Outreach Trainers.....	8
OSHA 510	OSHA Standards for the Construction Industry.....	8
OSHA 511	OSHA Standards for General Industry .....	9
OSHA 521	OSHA Guide to Industrial Hygiene.....	9
OSHA 2015	Hazardous Materials .....	9
OSHA 2045	Machinery and Machine Guarding Standards .....	9
OSHA 2225	Respiratory Protection .....	9
OSHA 2255	Principles of Ergonomics (formerly OSHA 2250) .....	9

OSHA 2264	Permit-Required Confined Space Entry.....	9
OSHA 3015	Excavation, Trenching and Soil Mechanics (formerly OSHA 3010).....	9
OSHA 3095	Electrical Standards.....	10
OSHA 3115	Fall Protection (formerly OSHA 3110 Fall Arrest Systems) ...	10
OSHA 5400	Trainer Course for the Maritime Industry .....	10
OSHA 5402	Update for Maritime Industry Outreach Trainers.....	10
OSHA 5410	OSHA Standards for the Maritime Industry .....	10
OSHA 5600	Trainer Course for Disaster Site Worker.....	10
OSHA 5602	Update for Disaster Site Worker Outreach Trainers.....	10
OSHA 5810	Hazard Recognition and Standards for Oil and Gas Exploration and Production .....	10
OSHA 6000	Collateral Duty for Other Federal Agencies.....	11
OSHA 6010	OSHA Course for Other Federal Agencies .....	11

## OSHA Seminars

OSHA 7000	OSHA Training Guidelines for Safe Patient Handling.....	11
OSHA 7005	Public Warehousing and Storage .....	11
OSHA 7100	Introduction to Machinery and Machine Safeguarding .....	11
OSHA 7105	Evacuation and Emergency Planning.....	11
OSHA 7110	Safe Bolting: Principles and Practices .....	11
OSHA 7115	Lockout/Tagout .....	12
OSHA 7125	Seminar on Combustible Dust Hazards.....	12
OSHA 7200	Bloodborne Pathogens Exposure Control for Healthcare Facilities .....	12
OSHA 7205	Health Hazard Awareness .....	12
OSHA 7210	Pandemic Influenza Preparedness .....	12
OSHA 7300	Understanding OSHA's Permit-Required Confined Space Standard.....	12
OSHA 7400	Noise Hazards in the Construction Industry.....	12
OSHA 7405	Fall Hazard Awareness for the Construction Industry .....	13
OSHA 7410	Managing Excavation Hazards.....	13
OSHA 7415	Construction Industry Hazards and Prevention Strategies ...	13
OSHA 7500	Introduction to Safety and Health Management .....	13
OSHA 7505	Introduction to Accident Investigation .....	13

OSHA 7510	Introduction to OSHA for Small Businesses.....	13
OSHA 7600	Disaster Site Worker .....	13
OSHA 7845	Recordkeeping Rule Seminar .....	13

## Specialized Safety & Health Courses

SH 200	Trainer Course in H2S (Hydrogen Sulfide).....	13
SH 241	HAZWOPER General Site Worker 40-Hour.....	14
SH 242	HAZWOPER General Site Worker Annual Refresher.....	13
SH 243	HAZWOPER Site Supervisor .....	14
SH 244	HAZWOPER First Responder Awareness Level.....	14
SH 245	HAZWOPER First Responder Operations Level.....	14
SH 246	HAZWOPER First Responder Awareness Level Annual Refresher .....	14
SH 247	HAZWOPER First Responder Operations Level Annual Refresher .....	14
SH 300	Safety Standards for Scaffolding.....	14
SH 340	Cranes, Derricks, and Material Handling.....	15
SH 400	Trainer Course for Medic First Aid and CPR .....	15
SH 560	ICS/NIMS for the Disaster Response Supervisor and Professional .....	15
SH 561	Disaster and Emergency Management for the Disaster Response Professional .....	15
SH 600	Workplace Violence: Prevention and Management.....	15
SH 601	Intermediate Accident Investigation and Photography .....	16
SH 630	Safety Training and Education Strategies.....	16
SH 701	Advanced Accident Investigation .....	16
SH 710	Blueprint Reading.....	16
SH 801	Enhancing Safety Performance with Behavioral Safety: Current Trends in BBS .....	16
SH 810	Written Program for Safety and Health Management .....	16
SH 900	Leading Measures for Improving Safety Performance .....	16
SH 910	Principles of Auditing.....	17
SH 913	Trainer Course for Hazard Communication/ Globally Harmonized System (GHS) .....	17
SH 920	Process Safety Management (PSM) Introduction .....	17

SH 930	Project Management for EHS Professionals.....	17
MC 101	Management System Design.....	17

## Healthcare Courses

HC 200	Joint Commission Healthcare Safety & Health Overview .....	17
HC 301	Trainer Course for Healthcare Employee Safety and Health.....	16

## Risk Management Courses

RM 101	Safety, Health, and Environmental Risk Management (SHERM) Principles.....	16
RM 201	Assessment Techniques .....	18
RM 202	Performance Measurement and Data Analysis .....	18
RM 203	Risk Informed Decision Making.....	18
RM 204	Human Performance Improvement and Safety Culture .....	18
RM 740	Critical Thinking and Analysis .....	19
RM 750	Risk Communication.....	19

## Environmental Courses

ETI 101	Introduction to Environmental Compliance.....	19
ETI 201	Fundamentals of the Clean Air Act.....	19
ETI 301	Introduction to Water and Wastewater Regulations .....	19
ETI 302	Storm Water Pollution Prevention Plans (SWPPP).....	20
ETI 303	Spill Prevention, Control, and Countermeasure (SPCC) .....	20
ETI 305	Wastewater Pretreatment - Strategies and Controls.....	20
ETI 401	Resource Conservation Recovery Act.....	20
ETI 405	Aboveground Storage Tank/Underground Storage Tank.....	20
ETI 501	EPA Outreach Trainer Course.....	20
ETI 720	Environmental Monitoring.....	21
ETI 722	Chemistry for the Environmental Professional .....	21
ETI 802	Pollution Prevention and Lean Principles Workshop.....	21
ETI 810	Environmental Audits.....	21

<b>Course Schedule by Date</b> .....	<b>22-27</b>

## PUBLIC SECTOR SAFETY AND HEALTH FUNDAMENTALS CERTIFICATE PROGRAM

Complete a minimum of seven (7) courses that include a minimum of 68 contact hours. Three (3) required courses as listed below for a minimum of 39 contact hours and a minimum of four (4) elective courses from the list below that include a minimum of 29 contact hours.

### GENERAL INDUSTRY

#### REQUIRED (3)

- OSHA 511 – Standards Course For General Industry
- OSHA 7500 – Introduction to Safety and Health Management
- OSHA 7505 – Introduction to Accident Investigation

#### ELECTIVES (4)

- OSHA 3095 – Electrical Standards
- OSHA 2264 – Permit-Required Confined Space Entry **or** OSHA 7300 - Understanding OSHA's Permit-Required Confined Space Standard
- OSHA 7000 – OSHA Training Guidelines for Safe Patient Handling
- OSHA 7005 – Public Warehousing and Storage
- OSHA 7100 – Introduction to Machinery and Machine Safeguarding
- OSHA 7105 – Evacuation and Emergency Planning
- OSHA 7115 – Lockout/Tagout
- OSHA 7200 – Bloodborne Pathogens Exposure Control for Healthcare Facilities
- OSHA 7205 – Health Hazard Awareness
- OSHA 7210 – Pandemic Influenza Preparedness
- OSHA 7845 – Recordkeeping Rule Seminar

### CONSTRUCTION INDUSTRY

#### REQUIRED (3)

- OSHA 510 – Standards for the Construction Industry
- OSHA 7500 – Introduction to Safety and Health Management
- OSHA 7505 – Introduction to Accident Investigation

#### ELECTIVES (4)

- OSHA 3015 – Excavation, Trenching and Soil Mechanics (formerly OSHA 3010) **or** OSHA 7410 – Managing Excavation Hazards
- OSHA 3095 – Electrical Standards
- OSHA 3115 – Fall Protection (formerly OSHA 3110) **or** OSHA 7405 – Fall Hazard Awareness for the Construction Industry
- OSHA 7105 – Evacuation and Emergency Planning
- OSHA 7110 – Safe Bolting: Principles and Practices
- OSHA 7205 – Health Hazard Awareness
- OSHA 7400 – Noise Hazards in the Construction Industry
- OSHA 7845 – Recordkeeping Rule Seminar

## SPECIALIST IN SAFETY & HEALTH

Earn your SSH in Disaster Response, Oil & Gas, Port Safety or Healthcare by completing the required courses and two (2) electives.

**NEW**

### DISASTER RESPONSE

#### REQUIRED (2)

- OSHA 7600 – Disaster Site Worker
- OSHA 511 – Standards Course for General Industry **or** OSHA 510 – Standards Course for the Construction Industry

#### ELECTIVES (2)

- Any one (1) OSHA course (except Trainer Courses)
- SH 241 – HAZWOPER General Site Worker 40-Hour **or** SH 245 HAZWOPER First Responder Operations Level

### OIL & GAS

**NEW**

#### REQUIRED (2)

- OSHA 5810 – Hazard Recognition for Oil and Gas Exploration and Production
- SH 200 – Trainer Course for H2S (Hydrogen Sulfide)

#### ELECTIVES (2) Any two (2) OSHA courses (except Trainer Courses)

- \_\_\_\_\_
- \_\_\_\_\_

### PORT SAFETY

**NEW**

#### REQUIRED (2)

- OSHA 5410 – Standards for the Maritime Industry
- SH 340 – Cranes, Derricks, and Material Handling

#### ELECTIVES (2) Any two (2) OSHA courses (except Trainer Courses)

- \_\_\_\_\_
- \_\_\_\_\_

### HEALTHCARE

**NEW**

#### REQUIRED (3)

- HC 200 – Strategies for Compliance by Healthcare Organizations in Employee Safety and Health
- HC 301 – Trainer Course for Healthcare Employee Safety and Health
- OSHA 511 – Standards Course for General Industry

#### ELECTIVES (2) Any two (2) OSHA courses (except Trainer Courses)

- \_\_\_\_\_
- \_\_\_\_\_

### ACCIDENT INVESTIGATION CERTIFICATE

**NEW**

#### REQUIRED (2)

- SH 601 – Intermediate Accident Investigation and Photography
- SH 701 – Advanced Accident Investigation

## SPECIALIST IN SAFETY & HEALTH

Earn your SSH by completing one (1) required course and three (3) electives in general industry or construction.

### GENERAL INDUSTRY

#### REQUIRED (1)

- OSHA 511 - Standards Course for General Industry

#### ELECTIVES (3)

- OSHA 521 - OSHA Guide to Industrial Hygiene
- OSHA 2015 - Hazardous Materials
- OSHA 2045 - Machinery and Machine Guarding Standards
- OSHA 2225 - Respiratory Protection
- OSHA 2255 - Principles of Ergonomics (formerly OSHA 2250)
- OSHA 2264 - Permit-Required Confined Space Entry
- OSHA 3095 - Electrical Standards
- OSHA 3115 - Fall Protection (formerly OSHA 3110)

### CONSTRUCTION INDUSTRY

#### REQUIRED (1)

- OSHA 510 - Standards Course for the Construction Industry

#### ELECTIVES (3)

- OSHA 2015 - Hazardous Materials
- OSHA 2225 - Respiratory Protection
- OSHA 2264 - Permit-Required Confined Space Entry
- OSHA 3015 - Excavation, Trenching and Soil Mechanics (formerly OSHA 3010)
- OSHA 3095 - Electrical Standards
- OSHA 3115 - Fall Protection (formerly OSHA 3110)
- SH 300 - Safety Standards for Scaffolding
- SH 340 - Cranes, Derricks and Material Handling

*In order to obtain your certification, download a Certificate Request Form from [uta.edu/ded/osha](http://uta.edu/ded/osha).*

## CERTIFIED SAFETY & HEALTH OFFICIAL

Earn your CSHO by completing six (6) required courses and two (2) electives in general industry or construction.

### GENERAL INDUSTRY

#### REQUIRED (6)

- OSHA 501 - Trainer Course in OSHA Standards for General Industry

**Prerequisites Required: OSHA 511 and 5 years safety experience.**

- OSHA 510 - Standards Course for the Construction Industry

**Completion of OSHA 500 or 502 meets requirements.**

- OSHA 521 - OSHA Guide to Industrial Hygiene
- OSHA 2045 - Machinery and Machine Guarding Standards
- OSHA 2264 - Permit-Required Confined Space Entry
- OSHA 3095 - Electrical Standards

#### ELECTIVES (2)

- OSHA 2015 - Hazardous Materials
- OSHA 2225 - Respiratory Protection
- OSHA 2255 - Principles of Ergonomics (formerly OSHA 2250)
- OSHA 3115 - Fall Protection (formerly OSHA 3110)

**Note: Two (2) OSHA seminars may be counted as one elective. See page 11.**

### CONSTRUCTION INDUSTRY

#### REQUIRED (6)

- OSHA 500 - Trainer Course in OSHA Standards for Construction

**Prerequisites Required: OSHA 510 and 5 years safety experience.**

- OSHA 511 - Standards for General Industry

**Completion of OSHA 501 or 503 meets requirements.**

- OSHA 521 - OSHA Guide to Industrial Hygiene
- OSHA 3015 - Excavation, Trenching and Soil Mechanics (formerly OSHA 3010)
- OSHA 3095 - Electrical Standards
- OSHA 3115 - Fall Protection (formerly OSHA 3110)

#### ELECTIVES (2)

- OSHA 2015 - Hazardous Materials
- OSHA 2045 - Machinery and Machine Guarding Standards
- OSHA 2225 - Respiratory Protection
- OSHA 2255 - Principles of Ergonomics (formerly OSHA 2250)
- OSHA 2264 - Permit-Required Confined Spaces Entry

**Note: Two (2) OSHA seminars may be counted as one elective. See page 11.**

## SAFETY, HEALTH & ENVIRONMENTAL PROFESSIONAL

Earn your SHEP by completing course work in Safety and Health, Environmental, and Risk Management. Completion of your SHEP credential fulfills the prerequisite requirement for the Master Certification Programs.

### REQUIRED (1)

- CSHO General Industry Certification  
*Requires no additional electives*
- CSHO Construction Industry Certification  
*Requires no additional electives*
- OSHA 501 - Trainer Course in OSHA Standards for General Industry  
*Requires four (4) electives*
- OSHA 500 - Trainer Course in OSHA Standards for Construction  
*Requires four (4) electives*

### ELECTIVES (4)

*\*With your CSHO, these electives are not required.*

- OSHA 521 - OSHA Guide to Industrial Hygiene
- OSHA 2015 - Hazardous Materials
- OSHA 2045 - Machinery and Machine Guarding Standards
- OSHA 2225 - Respiratory Protection
- OSHA 2255 - Principles of Ergonomics (formerly OSHA 2250)
- OSHA 2264 - Permit-Required Confined Space Entry
- OSHA 3015 - Excavation, Trenching and Soil Mechanics (formerly OSHA 3010)
- OSHA 3095 - Electrical Standards
- OSHA 3115 - Fall Protection (formerly OSHA 3110)
- OSHA 5810 - Hazards Recognition for Oil and Gas
- SH 300 - Safety Standards for Scaffolding
- SH 340 - Cranes, Derricks and Material Handling
- SH 810 - Written Program for Safety and Health Management

### REQUIRED (2)

- ETI 101 - Introduction to Environmental Compliance
- RM 101 - Safety, Health, and Environmental Risk Management Principles

### ELECTIVES (1)

- ETI 201 - Fundamentals of The Clean Air Act
- ETI 301 - Water and Wastewater Regulations
- ETI 401 - Waste Management Regulations
- ETI 501 - EPA Outreach Trainer Course
- ETI 802 - Pollution Prevention and Lean Principles

## MASTER CERTIFICATION

Earn your Master Certification in Safety & Health, Environmental, or Risk Management

*\* Look for courses in the catalog indicated with the MC shield.*

### SAFETY & HEALTH

#### REQUIRED (2)

- SHEP Certification
- MC 101 - Management System Design

#### ELECTIVES (3)

Three (3) Advanced Safety & Health Courses with/MC shield

- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

### ENVIRONMENTAL

#### REQUIRED (2)

- SHEP Certification
- MC 101 - Management System Design

#### ELECTIVES (3)

Three (3) Advanced Environmental Courses with/MC shield

- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

### RISK MANAGEMENT

#### REQUIRED (2)

- SHEP Certification
- MC 101 - Management System Design

#### ELECTIVES (3)

Three (3) Advanced Risk Management Courses with/MC shield

- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

*In order to obtain your certification, download a Certificate Request Form from [uta.edu/ded/osa](http://uta.edu/ded/osa).*

## CONTRACT TRAINING

**Do you need to train more than one person?** You may save considerable time and money while increasing the effectiveness of your training program by contracting with us to bring our courses and instructors directly to your location. The UT Arlington OSHA Education Center will deliver any course in this catalog at your location in a way that fits your schedule and budget. Our instructors will focus on your specific training needs and assess key risk components present at your facilities and job sites. Contract courses can also be scheduled in a timely sequence for multiple employees seeking one or more of our professional certifications. We will come to you...wherever you are!

<b>Potential savings when selecting a contract course over open enrollment:</b> <i>(Costs are based on a three-day course and GSA rates)</i>		
	<b>Open Enrollment</b> <i>5 employees</i>	<b>Contract Class</b> <i>Up to 20 employees</i>
Tuition:	\$595	\$7,000 (includes instructor costs)
Hotel:	\$420	Training held at a location of your choice
Airfare:	\$350	
Meals:	\$170	
<b>Cost per Employee:</b>	<b>\$1,535 per employee</b>	<b>\$250 per employee</b>
<b>Total Cost:</b>	<b>\$7,675 (5 employees)</b>	<b>\$7,000 (20 employees)</b>

## SAFETY & HEALTH CONSULTING

When you need services from experienced safety professionals, consider the UT Arlington OSHA Education Center as your solution. We can provide you with expert consultation on your safety and health programs in the construction, general, oil & gas, healthcare, public sector, disaster management, and maritime/port safety industries. Whether you need a one-time audit or more robust program design and/or support, the UT Arlington OSHA Education Center can provide you with the necessary resources.

**866-906-9190    Contact Us Today!    [osha@uta.edu](mailto:osha@uta.edu)**

## OSHA COURSES

### OSHA 500

#### Trainer Course in OSHA Standards for Construction

**30 Hours | \$695**

This course is designed for individuals interested in teaching the OSHA 10- and 30-hour construction safety and health Outreach Training Program to their employees and other interested groups. Using OSHA Construction Standards as a guide, special emphasis is placed on those topics required in the 10-and 30-hour programs as well as those which are most hazardous. Students are briefed on effective instructional approaches and use of visual aids and handouts. This course allows the student to become a trainer in the OSHA Outreach Training Program, to conduct both 10-and 30-hour Construction Outreach classes, and to issue cards to participants after verifying course completion.

### OSHA 501

#### Trainer Course in OSHA Standards for General Industry

**30 Hours | \$695**

This trainer course is designed for individuals interested in teaching the OSHA 10- or 30-hour General Industry safety and health Outreach training program to their employees and other interested groups. Using the OSHA General Industry Standards as a guide, special emphasis is placed on those topics required in the 10-and 30-hour programs as well as those which are most hazardous. Students are briefed on effective instructional approaches and use of visual aids and handouts. This course allows the student to become a trainer in the OSHA Outreach Training Program, to conduct both 10-and 30-hour General Industry Outreach classes, and to issue cards to participants after verifying course completion.

### OSHA 502

#### Update for the Construction Industry Outreach Trainers

**19 Hours | \$495**

This course is designed for Outreach Training Program trainers who have completed OSHA #500 Trainer Course in Occupational Safety and Health Standards for the Construction Industry and are authorized trainers in the OSHA Outreach Training Program. The course provides an update on OSHA Construction Standards, policies and regulations.

*Important Note: Authorized Outreach Training Program trainers are required to attend this course once every four (4) years to maintain their trainer status.*

### OSHA 503

#### Update for General Industry Outreach Trainers

**19 Hours | \$495**

This course is designed for Outreach Training Program trainers who have completed course 501. Trainer Course in Occupational Safety and Health Standards for General Industry and who are authorized trainers in the OSHA Outreach Training Program. The course provides an update on OSHA General Industry Standards, policies, and regulations.

*Important Note: Authorized Outreach Training Program trainers are required to attend this course once every four (4) years to maintain their status.*

### OSHA 510

#### OSHA Standards for the Construction Industry

**30 Hours | \$595**

This course covers the OSHA Standards, policies, and procedures in the construction industry. Topics include scope and application of the OSHA Construction Standards, construction safety and health principles, and special emphasis on those areas in construction which are most hazardous. Upon course completion students will have the ability to define construction terms found in the OSHA Construction Standards, identify hazards which occur in the construction industry, locate and determine appropriate OSHA Construction Standards, policies, and procedures, and describe the use of OSHA Construction Standards and regulations to supplement an ongoing safety and health program.

## FEATURED MILITARY SERVICE CENTER COURSE

### SH 385

#### EM 385-1-1 and OSHA Construction 30-Hour U.S. Army Corps of Engineers Safety and Health Requirements

**40 Hours | \$695**

This course is designed specifically for contractors, military, and government employees who enforce or must comply with the United States Army Corps of Engineers Safety and Health Requirements (EM 385-1-1, U.S. Army Corps of Engineers Safety & Health Requirements Manual) and OSHA 29 CFR 1926. Attendees will learn the unique procedures established by the U.S. Army Corps of Engineers contracts and EM 385-1-1 as well as the corresponding OSHA construction safety requirements and how to use this information to identify and control potential hazards on construction sites.

Course topics include Introduction to OSHA, Focus Four, recognition, avoidance, abatement, and prevention of safety and health hazards in construction. Specific topics cover preparation of Accident Prevention Plans (APP), Activity Hazard Analysis (AHA) development, Job-site inspections, a review of EM 385-1-1 safety and health requirements, and training on the 29 CFR 1926 OSHA Construction Standards.

Upon successful completion, attendees will receive a certificate of completion from The University of Texas Arlington for SH 385 and an OSHA 30-Hour Construction Card. [www.uta.edu/ded/msc](http://www.uta.edu/ded/msc)

## **OSHA 511** **OSHA Standards for General Industry**

**30 Hours | \$595**

This course covers the OSHA standards, policies, and procedures in general industry. Topics include scope and application of the OSHA General Industry Standards, general industry principles and special emphasis on those areas in general industry which are most hazardous. Upon course completion students will have the ability to define general industry terms found in the OSHA General Industry Standards, identify hazards which occur in general industry, locate and determine appropriate OSHA General Industry Standards, policies, and procedures, and describe the use of OSHA General Industry Standards and regulations to supplement an ongoing safety and health program.

## **OSHA 521** **OSHA Guide to Industrial Hygiene**

**26 Hours | \$595**

This course covers industrial hygiene practices and related OSHA regulations and procedures. Course topics include recognition, evaluation, and control of chemical, physical, biological and ergonomic hazards, Permissible Exposure Limits (PEL), OSHA health standards, respiratory protection, engineering controls, OSHA sampling protocols and strategies, and workplace health program elements. The course features workshops in health hazard recognition, OSHA health standards and use of sampling equipment.

## **OSHA 2015** **Hazardous Materials**

**26 Hours | \$595**

This course covers OSHA General Industry Standards and other consensus and proprietary standards that relate to the use of hazardous materials. Course topics include flammable and combustible liquids, compressed gases, LP-gases, and cryogenic liquids. Related processes such as spraying and dipping and use of electrical equipment in hazardous locations are also discussed. Upon course completion students will have the ability to assess compliance with OSHA hazardous materials standards, determine hazardous (classified) locations, and proper moving, storing, and handling of hazardous materials.

## **OSHA 2045** **Machinery and Machine Guarding Standards**

**26 Hours | \$595**

This course covers the various types of common machinery, machine safe guards, and related OSHA regulations and procedures. Guidance is provided on the hazards associated with various types of machinery and the determination of proper machine safe guards. Course topics include machinery processes, mechanical motions, points of operation, control of hazardous energy sources (lockout/tagout), guarding of portable powered tools, and common OSHA machine guarding violations. Program highlights include the ability to recognize hazards and provide options for control and hazard abatement through machines safeguarding inspection workshops.

## **OSHA 2225** **Respiratory Protection**

**26 Hours | \$595**

This course covers the requirements for the establishment, maintenance, and monitoring of a respiratory protection program. Course topics include terminology, OSHA Respiratory Protection Standards, NIOSH certification, respiratory protection programs, and medical evaluation requirements. Program highlights include workshops on respirator selection, qualitative and quantitative fit testing, and the use of respiratory protection and support equipment.

## **OSHA 2255** **Principles of Ergonomics (formerly OSHA 2250)**

**19 Hours | \$595**

This course covers the use of ergonomic principles to recognize, evaluate, and control workplace conditions that cause or contribute to musculoskeletal and nerve disorder. Course topics include work physiology, anthropometry, musculoskeletal disorders, use of video display terminals, and risk factors such as vibration, temperature, material handling, repetition, and lifting and patient transfers in health care. Course emphasis is on industrial case studies covering analysis and design of work situations and equipment workshops in manual lifting, and coverage of current OSHA compliance policies and guidelines.

## **OSHA 2264** **Permit-Required Confined Space Entry**

**22 Hours | \$595**

This course covers the safety and health hazards associated with permit-required confined space entry. Course topics include recognition of confined space hazards, identification of permit and non-permit required confined spaces, use of instrumentation to evaluate atmospheric hazards, ventilation techniques, developing and implementation of a confined space program, proper signage, and training requirements. This course features workshops on permit entry classification, instrumentation and program development.

## **OSHA 3015** **Excavation, Trenching and Soil Mechanics (formerly OSHA 3010)**

**22 Hours | \$595**

This course covers the OSHA Excavation Standards and safety and health aspects of excavation and trenching. Course topics include practical soil mechanics and its relationship to the stability of shored and unshored slopes and walls of excavations, introduction of various types of shoring (wood timbers and hydraulic), soil classification, and use of protective systems. Testing methods are demonstrated and students participate in workshops in the use of instruments such as penetrometers, torvane shears and engineering rods.

## **OSHA 3095** **Electrical Standards**

---

**26 Hours | \$595**

This course covers OSHA Electrical Standards and the hazards associated with electrical installations and equipment. Course topics include single-and three-phase systems, cord-and plug-connected and fixed equipment, grounding, ground fault circuit interrupters, and safety-related work practices. Emphasis is placed on electrical hazard recognition and OSHA Standards, policies, and procedures and applicable portions of the National Electrical Code (NEC). Students will participate in workshops on the safe and correct use of electrical testing equipment.

## **OSHA 3115** **Fall Protection (formerly OSHA 3110 Fall Arrest System)**

---

**22 Hours | \$595**

This course covers the OSHA Fall Protection Standards for construction and general industry and current fall protection methods. Course topics include principles of fall protection, components and limitations of fall arrest systems, and OSHA Standards and policies regarding fall protection. Students will participate in workshops demonstrating the inspection and use of fall protection equipment, residential construction fall protection, training requirements, and developing a fall protection program.

## **OSHA 5400** **Trainer Course for the Maritime Industry**

---

**30 Hours | \$695**

This course is designed for individuals interested in teaching the OSHA 10- and 30-hour Maritime Safety and Health Outreach Training Program to their employees and other interested groups. Special emphasis is placed on those topics that are required in the 10-and 30-hour Outreach Training Program as well as the most hazardous in the maritime industry using OSHA Maritime Standards as a guide. Students are briefed on effective instructional approaches and use of visual aids and handout. This course allows the student to become a trainer in the Outreach training Program, to conduct 10-and 30-hour maritime classes in shipyard employment, marine terminals, and longshoring, and to issue cards to participants after verifying course completion.

## **OSHA 5402** **Maritime Industry Trainer Update Course**

---

**19 Hours | \$495**

This course is designed for individuals who have successfully completed OSHA course #5400 Trainer course in OSHA Standards for the Maritime Industry and are active Outreach Training Program trainers. The course updates the OSHA Maritime standards, policies, and regulations.

*Important Note: Authorized Outreach Training Program trainers are required to attend this course once every four (4) years to maintain their trainer status.*

## **OSHA 5410** **OSHA Standards for the Maritime Industry**

---

**35 Hours | \$695**

This course covers OSHA policies, procedures, and standards for the maritime industry, specifically shipyard employment, marine terminals, and longshoring. Using the OSHA Maritime Standards as a guide, special emphasis is placed on those areas in the Maritime Industry which are most hazardous.

## **OSHA 5600** **Disaster Site Worker Trainer Course**

---

**30 Hours | \$695**

This course prepares experienced trainers to present the OSHA #7600 Disaster Site Worker Course, intended for second responders (those arriving hours or days after the event). Course topics include the National Response Framework, the Incident Command System, disaster work zone safety, respiratory protection, communication issues, applying elements of successful adult training programs, and knowledge, skills and attitudes to awareness training about safety and health standards at natural and human-made disaster sites. Students are provided the opportunity to practice knowledge and skills through discussion, planned exercises, demonstrations, and presentations. Lesson plans and training materials for the OSHA 7600 Disaster Site Worker course are provided.

## **OSHA 5602** **Update for Disaster Site Worker Trainer Course**

---

**7.5 Hours | \$395**

This course is intended to update the authorized Disaster Site Worker trainer with new technical and regulatory information related to disaster response and the role of OSHA in coordinating occupational safety and health in the National Response Framework. Participants will have the opportunity to share "lessons learned" from teaching OSHA #7600 Disaster Site Worker Course.

*Important Note: Authorized Outreach Training Program trainers are required to attend this course once every four (4) years to maintain their trainer status.*

## **OSHA 5810** **Hazard Recognition and Standards for On-Shore Oil and Gas Exploration and Production**

---

**30 Hours | \$695**

This course covers OSHA Construction and General Industry Standards related to the oil and gas industry. This course provides information for employees and employers to protect themselves by developing the knowledge and skills to anticipate, recognize, evaluate and control hazards common to the on-shore oil and gas exploration and production industry. This includes work sites associated with the on-shore exploration and production oil and gas industry including, but not limited to construction, drilling, completion, well servicing, production, product gathering and processing, and product transmission. This course is intended for employees and employers engaged in all phases of onshore oil and gas exploration and production.

## **OSHA 6000** **Collateral Duty for Other Federal Agencies**

**32 Hours | \$595**

This course covers the OSH Act, Executive Order 12196, and the OSHA General Industry Standards. This course is intended for federal agency collateral duty safety and health personnel. With use of OSHA General Industry Standards, special emphasis is placed on areas in the general industry which are most hazardous.

## **OSHA 6010** **OSHA Course For Other Federal Agencies**

**65 Hours | \$1395**

This course covers the recognition, evaluation, and control of safety and health hazards for federal agencies. Course topics include the OSH Act, Executive Order 12196, 29 CFR 1960 and 29 CFR 1910 General Industry Standards, understanding the Federal Safety and Health program regulations, identification of safety and health hazards, controlling hazards, hazard abatement and construction Focus Four topics. This course is intended for federal employees responsible for the occupational safety and health programs at their respective agencies.

## **OSHA SEMINARS**

### **OSHA 7000** **OSHA Training Guidelines for Safe Patient Handling**

**7.5 Hours | \$195**

This course covers OSHA ergonomic guidelines for safe patient handling and methods to protect workers in all health care settings. Using OSHA's Ergonomics Guidelines for Nursing Homes as a basis for any healthcare facility, this course focuses on analyzing and identifying ergonomic hazards and practical solutions to address these issues. Course topics include developing an ergonomic work process, risk factors in patient handling and transfers, identifying work processes with the potential for musculoskeletal injuries and illnesses, protocol for resident and patient assessment, and implementing solutions including work practices and engineering controls.

### **OSHA 7005** **Public Warehousing and Storage**

**7.5 Hours | \$195**

This course covers the hazards and injuries likely to occur in the public warehousing and storage operations, including encounters with powered industrial trucks, material handling, lifting and ergonomics, hazard communication, walking and working surfaces, and life safety including fire protection and evacuation. This course is intended for warehouse workers, supervisors and employers responsible for developing safe work practices and procedures in a warehouse setting.

## **OSHA 7100** **Introduction to Machinery and Machine Safeguarding**

**7.5 Hours | \$195**

This course covers the process to identify, select and properly safeguard machinery to protect employees and others in the work area and deliver appropriate training in safe work practices. Course topics include types of machinery requiring guarding, point of operation, emergency eyewash/shower requirements, hazard communication, OSHA Machinery and Machine Guarding Standards violations, and corrective actions. Upon course completion students will have the ability to explain hazardous actions and motions of various types of machinery, identify methods of safeguarding, and match identified safeguards with the applicable OSHA Machinery and Machine Guarding Standards to reduce and eliminate the potential for accidents and injuries.

## **OSHA 7105** **Evacuation and Emergency Planning**

**7.5 Hours | \$195**

This course covers OSHA requirements for emergency action and fire protection plans. Course topics include purpose and requirements of emergency action and fire prevention plans, elements of emergency evacuation plans, and features of design and maintenance of emergency exit routes. Students will participate in workshops pertaining to the development of emergency action plans. Upon course completion students will have the ability to list the elements of an emergency action plan and emergency evacuation floor plans, recognize violations of OSHA exit route requirements, determine whether their organization requires an emergency action plan, and develop and implement workplace emergency action and fire protection plans.

## **OSHA 7110** **Safe Bolting: Principles and Practices**

**7.5 Hours | \$195**

This course covers awareness of safety issues involved in bolting applications. Course topics include safe operation and handling of high powered bolting tools, pressure vessels and piping, machinery or mechanical joints, and structural connections. The course provides workshops and demonstrations of safe bolting applications. The target audience is first line mechanical operators including millwrights, pipefitters, and those who work with mechanical joints as part of their daily work. Upon course completion the student will have the ability to understand the basic technology of bolted joints, safety principles associated with tool selection and operation, workplace conditions, and bolting methods and procedures.

# COURSES

## **OSHA 7115** **Lockout/Tagout**

---

**7.5 Hours | \$195**

This course covers the role and responsibility of the employer to develop and implement an energy control program, or lock-out/tag-out (LOTO) for the protection of workers while performing servicing and maintenance activities on machinery and equipment. Course topics include types of hazardous energy, detecting hazardous conditions, implementing control measures as they relate to the control of hazardous energy, developing and implementing energy control programs including written isolation procedures, training of authorized and affected employees, and periodic inspection of energy control procedures using the OSHA Control of Hazardous Energy Standard. Upon course completion the student will have the ability to explain the importance of energy control programs, procedures, training, audits and methods of controlling hazardous energy.

## **OSHA 7125** **Seminar on Combustible Dust Hazards**

---

**7.5 Hours | \$195**

This course covers the hazards posed by combustible dust within general industry. The course topics include recognizing the hazards and risks associated with combustible dust, control of electrical installation hazards, and developing controls and strategies to prevent or mitigate combustible dust fires and explosions.

## **OSHA 7200** **Bloodborne Pathogens Exposure Control for Healthcare Facilities**

---

**7.5 Hours | \$195**

This course covers the development and implementation of Exposure Control Plans (ECP) for healthcare facilities. Course topics include understanding the OSHA Bloodborne Pathogens Standard, determining potential exposure and methods of control, developing an ECP, vaccinations, exposure incidents, training, and record keeping. The target audience is the program administrator, manager, or other personnel designated with the responsibility of developing a Bloodborne Pathogens ECP for a healthcare facility. Course highlights include students developing a template for their facility's ECP. Upon course completion students will have the ability to take a step-by-step approach in developing an ECP for their healthcare facility while utilizing the OSHA Bloodborne Pathogens Standard as a reference.

## **OSHA 7205** **Health Hazard Awareness**

---

**7.5 Hours | \$195**

This course covers common health hazards that are encountered in the workplace. These health hazards include exposure to chemicals, asbestos, silica and lead. Course topics include identification and evaluation of health hazards and their sources of exposure, health hazard information, and engineering and work practice controls. Students participate in workshops on evaluation and abatement of workplace health hazards. Upon course completion students will have the ability to understand common health hazards in the workplace and methods for controlling and abatement of these hazards.

## **OSHA 7210** **Pandemic Influenza Preparedness**

---

**7.5 Hours | \$195**

This course covers recognizing hazards and risks associated with a pandemic influenza event and developing strategies to assist a business, community, or family with realistic preparation for a pandemic event. Course topics include potential impact of a pandemic influenza event on a business and community, critical elements of a preparedness plan, and realistic strategies for supporting continuity of business. This course offers information on strategies that can be used to control the spread of the virus, minimizing exposure to employees and family, and resources available from OSHA and other government agencies. The intended audience is the business leader and members of their management team who may be integral to preparedness planning. Upon course completion, students will have the ability to prepare for a pandemic to assure business continuity and employee safety.

## **OSHA 7300** **Understanding OSHA's Permit-Required Confined Space Standard**

---

**7.5 Hours | \$195**

This course covers the requirements of the OSHA Permit-Required Confined Space Standard. Course topics include safety and health hazards associated with confined space entry, and the evaluation, prevention, and abatement of these hazards. The course covers OSHA requirements; it does not feature workshops (instrumentation, control methods and testing) which are included in the OSHA #2264 Permit-Required Confined Space Entry. This course is designed for small employers or a designated representative (line supervisor or manager) with the responsibility to develop a permit-required confined space program. Upon course completion students will have a basic understanding of confined space hazards, evaluating and abatement of the hazards, and determining when a confined space shall be classified as a permit-required confined space.

## **OSHA 7400** **Noise Hazards in the Construction Industry**

---

**7.5 Hours | \$195**

This course covers the evaluation and reduction of noise hazards in the construction industry. Course topics include OSHA Construction Noise Standards, properties of sound, noise-induced hearing loss, noise exposure control, selection and use of hearing protection, conducting sound level surveys, and worker training. Classroom demonstrations of noise instrumentation and hearing protection devices are featured. The target audience is the construction employer or representative designated with the responsibility to develop a construction noise program. Upon course completion students will understand the properties of sound and its relationship to noise-induced hearing loss, hearing protection usage, how to conduct sound level surveys and the requirements for training workers.

## OSHA 7405

### Fall Hazard Awareness for the Construction Industry

7.5 Hours | \$195

This course covers the identification, evaluation, prevention and control of fall hazards in the construction industry. The course focuses on falls to a lower level rather than falls to the same level resulting from slips and falls. Course topics include identifying, analyzing, and preventing fall hazards utilizing OSHA Fall Protection Standards. At the conclusion of the course, students will have an awareness level of identifying fall hazards and methods to control and abate the hazards.

## OSHA 7410

### Managing Excavation Hazards

7.5 Hours | \$195

This course covers the identification, evaluation, prevention and control of fall hazards in the construction industry. The course focuses on falls to a lower level rather than falls to the same level resulting from slips and falls. Course topics include identifying, analyzing, and preventing fall hazards utilizing OSHA Fall Protection Standards. At the conclusion of the course, students will have an awareness level of identifying fall hazards and methods to control and abate the hazards.

## OSHA 7415

### Construction Industry Hazards and Prevention Strategies

15 Hours | \$295

This course provides federal and public sector employees with pertinent information regarding OSHA requirements and guidelines applicable to construction industry activities and operations. Topics include recognition of major safety and health hazards in the construction industry, prevention strategies, safety and health management systems, OSHA requirements and guidelines, and resources available. The course is an interactive training session focusing on class discussion and workshops. Upon course completion students will have an awareness level of the major construction hazards and prevention strategies.

## OSHA 7500

### Introduction to Safety and Health Management

7.5 Hours | \$195

This course covers the effective implementation of a company's safety and health management system. The course addresses the four core elements of an effective safety and health management system and those central issues that are critical to each element's proper management. This course is an interactive training session focusing on class discussion and workshops. Upon course completion students will have the ability to evaluate, develop, and implement an effective safety and health management system for their company.

## OSHA 7505

### Introduction to Accident Investigation

7.5 Hours | \$195

This one-day course covers an introduction to basic accident investigation procedures and describes accident analysis techniques. Course topics include reasons for conducting accident investigations, employer responsibilities related to workplace accident investigations,

and a six step accident investigation procedure. The target audience is the employer, manager, employee or employee representative who is involved in conducting accident and/or near-miss investigations.

## OSHA 7510

### Introduction to OSHA for Small Businesses

4 Hours | \$195

This course covers an introduction to the Occupational Safety and Health Administration (OSHA) and the OSH Act for owners and managers of small businesses. Course topics include an introduction to OSHA, OSHA Standards, the inspection process, implementing a safety and health program, worker training requirements and assistance available to small businesses. Upon course completion students will understand OSHA operations and procedures and how to work with OSHA to prevent or reduce injuries and illnesses in their workplace.

## OSHA 7600

### Disaster Site Worker

15 Hours | \$395

This course is designed for personnel who provide skilled support services or site clean-up services (including hazardous waste cleanup) in response to a disaster. The goal of this course is to increase the participant's awareness of the safety and health hazards that may be encountered at a natural or human-caused disaster site. The importance of respiratory protection, other Personal Protective Equipment and proper decontamination procedures that may be used to mitigate the hazards will be emphasized.

## OSHA 7845

### Recordkeeping Rule Seminar

4 Hours | \$195

This course covers OSHA requirements for maintaining and posting records of occupational injuries and illnesses, and reporting specific cases to OSHA. Upon course completion students will have the ability to identify OSHA requirements for recordkeeping, posting and reporting and to complete OSHA Form 300 Log of Work-Related Injuries and Illnesses, OSHA Form 300A Summary of Work-Related Injuries and Illnesses, and OSHA Form 301 Injury and Illness Incident Report.

## SPECIALIZED SAFETY & HEALTH COURSES

### SH 200

#### Trainer Course in H2S (Hydrogen Sulfide)

20 Hours | \$595

This course is designed to provide participants with the skills and knowledge to train employers and employees on the hazards associated with H<sub>2</sub>S. This course is designed for personnel interested in conducting Hydrogen Sulfide (H<sub>2</sub>S) training for companies in the petroleum or other industry with potential H<sub>2</sub>S presence in the work environment. Special emphasis is placed on ANSI/ASSE Z390.1-2006 and the required topics in 29 CFR 1910.1200, Hazard Communication.

## **SH 241** **HAZWOPER General Site Worker 40-Hour**

---

**40 Hours | \$595**

This course is designed to fulfill training requirements for hazardous waste cleanup workers listed within Title 29 Code of Federal Regulations 1910.120(e). Topics include: scope, application, and definitions; safety and health programs; site characterization and analysis; site control; training; medical surveillance; engineering controls, work practices, and personal protective equipment; monitoring; site safety and health plans; drums and containers; decontamination; and on-site emergencies.

## **SH 242** **HAZWOPER General Site Worker Annual Refresher**

---

**8 Hours | \$150**

This course is designed as a refresher course for individuals who have current certification as a HAZWOPER General Site Worker. This training is required within one year of the initial 40-hour course completion and yearly thereafter. This course discusses and reviews changes in Federal and State regulations as well as relevant, upcoming legislation. In addition, developments in state-of-the-art practices and technologies, as well as key aspects from the initial training is discussed. This course satisfies the annual refresher training requirements of Title 29 Code of Federal Regulations, Part 1910.120(e).

## **SH 243** **HAZWOPER Site Supervisor**

---

**8 Hours | \$150**

This course is designed to fulfill the OSHA regulatory requirements listed within Title 29 Code of Federal Regulations 1910.120(e) for on-site managers and supervisors directly responsible for employees engaged in hazardous waste operations. Topics include: corporate safety and health programs; employee training requirements; personal protective equipment programs; spill containment programs; respiratory protection programs; medical surveillance programs; and state-of-the-art practices and procedures.

## **SH 244** **HAZWOPER First Responder Awareness Level**

---

**8 Hours | \$150**

This course is designed for individuals who are likely to witness or discover a hazardous substance release. This course provides the required training so these individuals may initiate an emergency response sequence by notifying the proper authorities of the release. Topics covered in the course include: hazardous materials and the risks associated with them; potential outcomes associated with an emergency incident; hazmat recognition; hazmat identification; the role of the awareness level individual; site security and control; DOT Emergency Response Guidebook; additional resource needs; and communications.

## **SH 245** **HAZWOPER First Responder Operations Level**

---

**24 Hours | \$395**

This course is designed for individuals who respond to releases or potential releases of hazardous substances for the purpose of protecting nearby persons, property, or the environment. This program provides these individuals with the training required to respond in a defensive fashion without actually trying to stop the release and to contain the release from a safe distance, keep it from spreading, and prevent exposures. Topics include: basic hazard and risk assessment techniques; personal protective equipment; hazardous material terms; control, containment, and confinement operations; decontamination procedures; incident command system; toxicology; and pre-event and event specific planning.

## **SH 246** **HAZWOPER First Responder Awareness Level Annual Refresher**

---

**8 Hours | \$150**

This course is designed as a refresher course for those individuals who have current certification as a HAZWOPER First Responder at the Awareness Level. This training is required within one year of the initial course completion and yearly thereafter. Topics include: hazardous materials and the risks associated with them; hazmat recognition and identification; the role of the awareness level individual; site security and control; the Emergency Response Guidebook; additional resource needs; and, communications. This course satisfies the annual refresher training requirements of Title 29 Code of Federal Regulations, Part 1910.120(q).

## **SH 247** **HAZWOPER First Responder Operations Level Annual Refresher**

---

**8 Hours | \$150**

This course is designed as a refresher course for those individuals who have current certification as a HAZWOPER First Responder at the Operations Level. This training is required within one year of the initial course completion and yearly thereafter. Topics include: basic hazard and risk assessment techniques; personal protective equipment; hazardous material terms; control, containment, and confinement operations; decontamination procedures; incident command system; toxicology; and, pre-event and event specific planning. This course satisfies the annual refresher training requirements of Title 29 Code of Federal Regulations, Part 1910.120(q).

## **SH 300** **Safety Standards for Scaffolding**

---

**24 Hours | \$595**

This course is designed to familiarize participants with the procedures, regulations, and safety standards for scaffolding. Scaffold users and safety professionals will benefit from this course by learning to identify and control hazards associated with scaffolding. Includes reviews of systems such as; frame scaffolding, rolling scaffolding, tube and clamp, system scaffolding, and suspended scaffolding.

## SH 340 Cranes, Derricks, and Material Handling

20 Hours | \$595

This course is designed to familiarize the participant with the various types of cranes and derricks covered under new OSHA standard 29 CFR 1926 Subpart CC as well as the changes to various other subparts made as part of the rulemaking process for Subpart CC. Students are provided with information concerning crane operations, crane inspection and maintenance, rigging inspection, reading load charts, and corresponding OSHA and consensus standards. Exercises in applying OSHA and ANSI standards, reading load charts and rigging tables, and preventing accidents are conducted.

## SH 400 Trainer Course for Medic First Aid and CPR

16 Hours | \$495

This course is designed to help students build essential lifesaving skills. Students will be qualified to train others in Medic First Aid/CPR, use of Automated External Defibrillators (AEDs), disease prevention from Bloodborne Pathogens, and Infant Child rescue skills and AED applications. Students will apply those skills in optional scenario-based practices. There are additional requirements imposed by Medic First Aid (MFA) for their services, which include establishing a MFA training center and purchase of one training program. For more information contact the Health and Safety Institute at 800-447-3177 or visit [www.hsi.com](http://www.hsi.com).

## SH 560 ICS/NIMS for the Disaster Response Supervisor and Professional

24 Hours | \$595

This course is designed for those individuals who may have leadership responsibilities at a natural or man-caused disaster site. The Incident Command System (ICS) and the National Incident Management System (NIMS) are studied in detail with emphasis on their roles and uses during the crisis management and consequence management phases of disaster response work. Upon successful completion of

this course, participants will satisfy a core requirement of the Disaster Response Supervisor and Professional Certificates and earned course completion certificates from UTA OTIEC and the FEMA Emergency Management Institute.

## SH 561 Disaster and Emergency Management for the Disaster Response Professional

32 Hours | \$695

This advanced course develops the participant's capabilities to effectively fill a leadership role in the disaster/emergency operations and management process in order to protect the lives, environment, and property threatened by natural or man-caused disasters. It provides a structure for anticipating and dealing with preparedness, prevention, protection, response, recovery, and mitigation of the hazards found during the crisis and consequence management phases of disaster/emergency sites. Upon successful completion of this course participants will have satisfied a core requirement of the Disaster Response Professional Certificate and earned course completion certificates from UTA and the FEMA Emergency Management Institute.

## SH 600 Workplace Violence: Prevention and Management

12 Hours | \$395

This course is designed to provide participants with the current OSHA definitions and guidelines related to workplace violence, as well as proactive preventive and management strategies. The program includes SAMA (Satori Alternatives to Managing Aggression) training in de-escalation techniques and simple ways to protect them from harm. This is an excellent opportunity for front-line employees, safety/security staff, and supervisors, to gain skills that help them provide a safe and secure environment for themselves, their colleagues, and their customers/clients/patients.

## FEATURED CONTINUING EDUCATION COURSE

### Master Certificate in Construction Management

Advances in construction technologies, financing, and methods underscore the need for a sound and systematic management of construction projects. To meet growing industry demands the Division for Enterprise Development (DED), in partnership with the College of Engineering, introduces the Master Certificate in Construction Management. Courses begin February 2014!

This program consists of four 15 hour courses:

- Principles of Construction Management and Contracts
- Construction Specifications and Documentation
- Construction Project Cost Estimation
- Project Planning and Scheduling

[www.uta.edu/ded/mccm](http://www.uta.edu/ded/mccm)

## SH 601 Intermediate Accident Investigation and Photography

24 Hours | \$595

This three-day course provides the participant with accident investigation procedures and analysis techniques beyond the basic level. The goal of the course is to help participants gain the skills necessary to conduct more effective accident investigations at their workplace. This course also includes a full day of instruction on the proper use of digital photography and its role in conducting and documenting the scene of an accident.

*Note: this course satisfies part of the Accident Investigation Certificate requirements.*

## SH 630 Safety Training and Education Strategies

8 Hours | \$195

This course reviews adult learning principles and the NIOSH, OSHA, and ANSI recommendations for developing effective safety training and education. Participants are provided with a methodology which integrates these concepts into an effective safety training development model. The training development model includes information on needs assessment, training design, course development, training delivery, and course evaluation. This information will be useful in developing and delivering effective safety and occupational health training. Workshops provide hands on experience in course development.

## SH 701 Advanced Accident Investigation

32 Hours | \$695

This 4-day course will teach participants advanced skills in conducting accident investigations that will aid in determining contributing factors that lead to the injury or fatality and how to develop a course of action to prevent future problems. Participants will also learn the importance of conducting a thorough investigation in a consistent manner that will, if necessary, stand up in court. Topics also include calculation of the costs, direct and indirect, associated with an accident. Coursework includes lecture, in-class workshops and case studies, and out-of-class work.

*Note: this course satisfies part of the Accident Investigation Certificate requirements.*

## SH 710 Blueprint Reading

8 Hours | \$195

This course is designed to provide participants with basic instruction on blueprint reading to enable them to understand various types of blueprints, shop prints and schematics used in both the industrial and construction environments. Participants learn to identify and interpret the different standards for symbols and abbreviations found on electrical construction drawings, schematics, and wiring diagrams. Participants will also learn fire safety and building code requirements and hazard identifications. Participants will also gain the skills and abilities to provide construction recommendations that will improve overall safety of the facility and the construction process.

## SH 801 Enhancing Safety Performance with Behavioral Safety: Current Trends in BBS

24 Hours | \$895

This course is designed to provide participants with a thorough understanding of Behavior-Based Safety and begins with the evolution of BBS including the underlying principles, common myths and half-truths. Emphasis is given to lessons learned from experience and research. Long-term goals for BBS are identified along with proven steps organizations can take that lead to safety excellence. Participants will learn how to develop observation and feedback skills, how to use behavioral data to improve performance, ways to handle common barriers, and strategies to motivate employee safety performance. Current trends in BBS will be analyzed, including how to sustain a BBS process and keep it fresh. Case studies will be utilized to illustrate both successful implementations and lessons learned.

## SH 810 Written Program for Safety and Health Management

40 Hours | \$995

This course is designed to provide participants with the skills and knowledge to develop and implement of a company's safety and health management system, with emphasis on the written program. This course addresses the eight core elements of an effective safety and health system and those central issues that are critical to each element's development, implementation and proper management through the use of written material. Using a hands-on approach, participants will have an opportunity to develop policies, procedures and checklists that are required to effectively manage their safety system.

*In addition to the SH810 certificate, participants will receive an OSHA 7500, Introduction to safety Health Management Certificate.*

## SH 900 Leading Measures for Improving Safety Performance

24 Hours | \$895

This advanced safety and health course is designed to provide participants with the skill and knowledge, to identify key steps and develop implementation strategies for an organization to effectively apply leading measures for improving safety performance. Participants will gain enhanced skills for measuring and prioritizing organizational risks. The course will also address corporate success measures, reward, and recognition programs, and help participants identify potential pitfalls of performance measurement systems. The use of case studies, job safety analyses, and near-miss (near-hit) reports will be utilized to foster practical application of a leading measure approach to improving safety performance.

## SH 910 Principles of Auditing

24 Hours | \$865

This course is designed to provide participants with the fundamental principles needed to conduct auditing activities related to regulatory compliance, contractual performance, or individual skills and knowledge. Participants will develop auditing skills including planning, procedures, evaluation, and management. The course will specifically address training audits, contractor performance audits, and compliance audits utilizing the Process Safety Management Standard 29 CFR 1910.119.

## SH 913 Trainer Course for Hazard Communication and the Globally Harmonized System (GHS)

8 Hours | \$245

This course is designed for employers to use in complying with the requirement to train their employees on the Globally Harmonized System of classification and labeling of chemicals (known as GHS). The course materials will cover the regulatory requirements for container labeling, the 9 pictograms and their meanings, the Safety Data Sheet format and content requirements. Participants will receive a Trainer's Tool Kit containing a PowerPoint presentation covering the knowledge requirements, instructor notes, student handouts, the GHS/SDS OSHA Quick Cards, a written comprehension test, an answer key, and a certificate of completion.

## SH 920 Process Safety Management (PSM) Introduction

32 Hours | \$995

Process Safety Management, or PSM, is an OSHA requirement for companies that utilize Highly Hazardous Chemicals (HHC) in their manufacturing process. The OSHA requirements were developed in response to the Clean Air Act. This course describes the procedures required by OSHA and instructs the student in how to design a full implementation of a PSM program that addresses the hazard issues and is compliant with the OSHA requirements. The course is designed for anyone who is in the management of a PSM facility or whose responsibilities include establishing or auditing the process to ensure compliance.

## SH 930 Project Management for EHS Professionals

28 Hours | \$995

Project Management is both an art and a science. This course introduces EHS professionals to the methodology, tools, and techniques needed to deliver successful projects. Participants will learn the fundamentals of the project management framework consisting of project initiation, planning, execution, control, and closure. Through course exercises and scenarios, participants will build skills in assessing and managing stakeholders, identifying and controlling project scope, developing a Project Plan and other critical project documentation, managing risks, and building the project schedule and budget.

## MC 101 Management System Design

92 Hours | \$2895

The management system course provides the participant the opportunity to design the core elements of a management system for environmental, risk, safety and health programs. The goal of this course is to assist participants in the design and development of a management system through classroom instruction, case studies, and student exercise activities.

*Note: Participants must attend all three sessions – Session 1 (5 days), Session 2 (4 days) and Session 3 (3 days). Sessions are scheduled on monthly increments.*

## HEALTHCARE COURSES

### HC 200 Joint Commission Healthcare Safety & Health Overview

8 Hours | \$195

This is a one-day presentation that will give participants insight on how to reduce exposure to biological and airborne hazards in healthcare per the requirements of OSHA and JCAHO standards. Emergency preparedness, ergonomics and workplace violence prevention in healthcare will also be discussed. The information in this course will help to create a safer workplace in healthcare organizations.

## FEATURED HEALTHCARE COURSE

### Emergency Medical Technician

96 Clinical Hours | \$3000/38 Sessions

EMT's work under the direct supervision of Emergency Medical Services Paramedics. Classroom and practical instruction prepare the students to handle a wide range of tasks related to emergency care. In this course students will learn: patient assessment, basic life support, pre-hospital care (controlling bleeding, bandaging wounds, immobilizing broken bones), dispatcher communication, ambulance driving, and ambulance maintenance. Upon completion of the course, students will take the certification exam through Pearson Vue for the National Registry of Emergency Medical Technicians.

[www.uta.edu/ded/hci](http://www.uta.edu/ded/hci)

## HC 301

### Trainer Course for Healthcare Employee Safety and Health

16 Hours | \$395

This course is designed for health care professionals who want to plan and present safety and health courses to their employees/colleagues. The program covers topics specific to making safety and health training engaging, relevant, and impactful for all Healthcare workers. In addition to the content, the participants will receive a Trainer's Tool Kit with a variety of resources and training materials.

## RISK MANAGEMENT COURSES

### RM 101

#### Safety, Health, and Environmental Risk Management (SHERM) Principles

32 Hours | \$695

This course is designed to provide participants with an overview of the risk management and insurance profession from the health and safety program perspective. Specific topics covered will include: identifying and analyzing loss exposures, risk management alternatives, implementation and monitoring the effectiveness of selected risk management techniques, and suggested strategies for improving environmental, safety, and health programs using risk management principles.

### RM 201

#### Assessment Techniques

24 Hours | \$895

This course focuses on how to prepare for and conduct assessments, identifying issues, and the disposition of those issues. Classroom lecture and experiential exercises are utilized to provide students the opportunity to put into practice the knowledge and skills presented. Assessments are used to systematically gather information which is analyzed against approved criteria to identify potential issues related to compliance, performance, and effectiveness. When issues are found, decisions and corrective actions can be developed to improve performance based on the facts.

### RM 202

#### Performance Measurement and Data Analysis

36 Hours | \$995

The foundation of a successful risk management program is the establishment and implementation of an effective performance measurement and data analysis system. In this course students will gain the knowledge and skills necessary for them to establish, implement, and maintain a performance measurement system in their organizations as it relates to their business enterprise. For the HSE professional, analyzing and trending data is significant to one's performance measures and an effective risk management program. The conversation of data to useful information that can be used by organizations to improve their systems and processes is a vital piece of the performance management process and risk management program.

### RM 203

#### Risk-Informed Decision Making

24 Hours | \$895

This course will use a combination of illustrated case studies, lectures, and individual and group exercises to introduce students to the various facets, methodologies, tools, and practical applications of risk-informed decision making. One of the many goals of this course is to help students make better risk-informed decisions by introducing more structured decision-making processes that focuses on five critical, yet interrelated, steps. These steps are as follows: identifying potential undesired outcomes, assigning an order-of-magnitude consequence severity to each outcome, assigning an order-of-magnitude occurrence likelihood to each outcome, assessing total risk magnitude, and making riskinformed decisions based on assessed risk magnitudes.

## FEATURED TECHNOLOGY COURSE

### CYB 601

#### Introduction to Cyber Risk

This is the first course of a series of courses designed to provide organizational leaders at various levels with sufficient knowledge and skills to drive improvements to their organization's cybersecurity capabilities. This three-day course is designed for busy risk managers and other leaders who need to understand cyber risk. Includes discussions on such topics as real-world examples of cyber attacks, assessing risks, and responding to risks. In this rapidly changing field, this course is built upon the recently released National Institute of Standards (NIST) cybersecurity framework. By completing this course, participants will understand, value and apply organizational cybersecurity risk management including assessment, analysis and risk-based decision making.

**Materials Provided:** Introduction to Cyber Risk Participant Workbook (©UTA, 2013). For a complete course description and more information, visit our website at [uta.edu/ded](http://uta.edu/ded)

## RM 204 Human Performance Improvement and Safety Culture

24 Hours | \$895

This course will provide an overview of human performance and incompatibilities in management and leadership practices that lead to organizational weaknesses in work processes that lead to human error. We will address the principles of human performance improvement and we will explore what is meant by a strong safety culture, the principles of a strong safety culture, and how to evaluate the safety culture in your business enterprise. Understanding human performance and safety culture allows us to make better risk informed decisions for our enterprise.

## RM 740 Critical Thinking and Analysis

8 Hours | \$195

This course provides attendees with skills to improve reasoning, root cause analysis, and their decision making skills. Numerous techniques for conceptualizing, analyzing, synthesizing, evaluating, and applying information are provided. Problem solving, decision making, and planning skills will be discussed. Learn methods to gather information by observation, interviewing, experience, reflection, reasoning, and communication.

## RM 750 Risk Communication

8 Hours | \$195

This course discusses crisis and emergency risk communication theory and techniques. Participants will learn the fundamentals of effective risk communication and the pitfalls to avoid them based on real life examples. Participants will also learn the required steps toward developing and carrying out an effective risk communication plan. Several strategies are suggested to achieve risk communication objectives. Approaches considered will cover communicating effectively in high-stress, low-trust, emotionally charged and/or controversial situations and the importance of proper dialogue among individuals, communities, and organizations responsible for and/or affected by environmental, safety, and health hazards.

## SH 701 Advanced Accident Investigation

32 Hours | \$695

This 4-day course will teach participants advanced skills in conducting accident investigations that will aid in determining contributing factors that lead to the injury or fatality and how to develop a course of action to prevent future problems. Participants will also learn the importance of conducting a thorough investigation in a consistent manner that will, if necessary, stand up in court. Topics also include calculation of the costs, direct and indirect, associated with an accident. Coursework includes lecture, in-class workshops and case studies, and out-of-class work.

*Note: this course satisfies part of the Accident Investigation Certificate requirements.*

## ENVIRONMENTAL COURSES

*For all your environmental training and consulting needs, including professional certifications, please visit the Environmental Training Institute's webpage at: [uta.edu/ded/eti](http://uta.edu/ded/eti).*

### ETI 101 Introduction to Environmental Compliance

32 Hours | \$895

This course is designed to give environment, safety and health professionals the tools they need to reduce environmental risks. The course will present a full overview of the EPA environmental regulations and demonstrate how to identify pertinent regulations to your operations.

It will also cover elements of the major environmental programs at the State level and review the enforcement and compliance tools by regulatory area. Activities and case studies will be used throughout the course to apply the material presented during the course.

*Note: ETI 101 with completion exam will serve as the training prerequisite to the ETI 501 course.*

### ETI 201 Fundamentals of the Clean Air Act

20 Hours | \$750

The Clean Air Act (CAA) requires facilities to implement robust air emission control practices which are regulated and enforced through a complex permitting process. During this class, the instructor will give an overview of the most pertinent CAA requirements including the New Source Review process and Title V permitting as well as programs to manage hazardous air pollutants and criterion pollutants. Using classroom activities and presentations with a discussion of compliance and enforcement activities, students will gain an understanding of what requirements may apply to their facilities and the path to compliance.

## ETI 301

### Introduction to Water and Wastewater Regulations

24 Hours | \$795

This course provides an introduction to the Clean Water Act (CWA) and the National Pollutant Discharge Elimination System (NPDES), to include the NPDES permit types for storm water, industrial wastewater, domestic wastewater, and pre-treatment. Case studies and class activities will be used to provide opportunities for participants to utilize knowledge gained during the course. The course will facilitate student's ability to attain and maintain compliance with applicable water and wastewater regulations, and to better understand how those regulations impact their organization.

## ETI 302

### Storm Water Pollution Prevention Plans (SWPPP)

16 Hours | \$650

This course covers the fundamental requirements of a storm water pollution prevention plan including how to identify your facility's potential sources of pollution, discharge, or contamination, and methods to prevent and control storm water pollution through the implementation of BMPs. From new construction to plant operations, participants will gain an understanding of erosion and sedimentation challenges as well methods to monitor and evaluate the effectiveness of SWPPPs.

## ETI 303

### Spill Prevention, Control, and Countermeasure (SPCC)

16 Hours | \$650

Under the Clean Water Act (CWA), the U.S. Environmental Protection Agency (EPA) requires that regulated oil storage facilities develop and implement oil spill prevention, control, and countermeasure (SPCC) plans. In addition to the CWA requirements, the federal Oil Pollution Act of 1990 (OPA) requires that facilities detail and implement spill prevention and control measures in their Facility Response Plans (FRPs).

In this spill prevention training course, participants will learn about the following:

- SPCC plans
- Pollution regulations
- Proper storage of oil
- Oil transfer procedures
- Proper containment practices including secondary containment
- Methods to avoid security breaches and follow proper discharge procedures.

*Note: Previously ETI 702.*

## ETI 305

### Wastewater Pretreatment – Strategies and Controls

16 Hours | \$650

This course provides an introduction to the wastewater pretreatment regulatory program regulated under the Clean Water Act. Students

will learn the keys to the basic requirements and the practical applicability of pretreatment regulations to their operations. Attendees will gain an understanding of when permits are needed and how to effectively implement them to maintain compliance. The course will introduce attendees to the principles, characteristics and operations of wastewater pretreatment technologies used to control environmental impacts. Case studies and class activities will provide the attendees opportunities to apply the principles presented.

## ETI 401

### Resource Conservation Recovery Act

32 Hours | \$895

This course is designed for professionals who need to understand rules and regulations for managing, storing, and shipping hazardous waste; solid waste management and underground storage tanks (USTs). Participants will learn about the federal Resource Conservation and Recovery Act (RCRA) and become familiar with a wide array of related federal, state and local agencies as well as their requirements. The course will present the basics of managing non-hazardous waste, permitting processes, common violations, and waste minimization.

## ETI 405

### Aboveground Storage Tank/Underground Storage Tank

16 Hours | \$650

Proper tank management of hazardous materials and petroleum products is critical to maintaining water quality. Aboveground and underground storage tank management through technical, maintenance and regulatory requirements are the core elements to prevent and/or minimize releases.

This course is designed to give environment, safety and health professionals a background, overview and basic understanding of UST and AST systems and components, laws, policies and guidelines to ensure compliance with federal environmental regulations as well as the major environmental programs at the State level. Activities and case studies will be used throughout the course to allow attendees to apply knowledge of the topics discussed during the course.

## ETI 501

### EPA Outreach Trainer Course

32 Hours | \$695

Environmental compliance is the responsibility of all workers. The challenge is communicating and integrating environmental compliance into operations. Attendance and successful completion of this course will prepare trainers to teach ETI 601, EPA 8-Hour Environmental Hazard Awareness course. During the course, EPA topics will be reviewed and training techniques presented, to promote environmental awareness among workers and equip them to better protect human health and environmental resources.

Various instructional approaches including the effective use of visual aids and handouts are covered, with course participants working in groups or independently to practice presentations of selected topics.

Successful completion of this course and the final examination will allow the participant to be recognized by The University of Texas at Arlington as an EPA Outreach Trainer with a wallet card provided to

identify the trainer's status, which will be valid for three (3) years.

*Note: Participants are encouraged to bring a laptop to work on presentation materials.*

*Prerequisites: ETI 101 - Introduction to Environmental Compliance with completion exam AND three years of environmental program experience. A college or master's degree in environmental programs or a Registered Environmental Manager (REM) designation from the National Registry of Environmental Professions may be substituted for two years of experience.*

## ETI 720 Environmental Monitoring

16 Hours | \$650

Environmental sampling is one of the primary methods of determining the effectiveness of controls. This class provides an overview of basic environmental monitoring techniques and the following will be covered:

- Identifying when environmental monitoring is required
- Sampling basics for air, water and soil
- Units of measurement
- Review of documentation
- Sample handling
- Analytical and statistical errors

*Note: Previously ETI 208.*

## ETI 722 Chemistry for the Environmental Professional

20 Hours | \$750

This class is designed for the environmental professional seeking knowledge in basic chemistry practices to assist them in every day decision making. This class reviews the following topics:

- Chemical compatibility/reactivity
- Chemistry and Safety Data Sheets
- Organic compounds
- Metals
- Chemical and physical reactions
- Chemical measurements
- Calculating and reporting for the environmental professional
- Chemical effects on the environment
- Chemical movement in the air, water and soil

Using case studies, these concepts will be explored in two and half days. This class provides attendees tools to understand environmental data and chemical analyses to identify treatment options.

*Note: Previously ETI 210.*

## ETI 802 Pollution Prevention and Lean Principles Workshop

24 Hours | \$495

In this three-day workshop, learn to apply the pollution prevention and lean principles to your operations through a unique blend of written and interactive group activities and collaboration. During the first two days, you will analyze your operations and identify which activities add value. As part of the workshop, techniques to translate environmental goals into business critical operations are presented.

On the third day of the workshop, attendees will be provided an opportunity to develop an action plan to improve the bottom line, reduce their regulatory burdens, and increase the overall efficiency of their organization.

*Note: Course tuition is supported by a US Environmental Protection Agency funding as part of the Pollution Prevention Grant program.*

## ETI 810 Environmental Audits

24 Hours | \$895

EH&S professionals will learn how to prepare for an environmental audit of their site by a regulatory agency, an ISO audit, or a corporate audit. This course will prepare your staff and management team for an audit, how to use the audit findings and/or recommendations to improve facilities performance, and how to provide best practices to facilitate your organization's team effectiveness and efficiencies.

# Safety Week 2014

**NEW! For 2014**, the UT Arlington OSHA Education Center will be conducting four (4) very special events: Safety Week 2014. Held in the DFW and Greater Houston areas, Safety Week 2014 will feature up to eighteen (18) OSHA Seminars, including:

- OSHA 7000 – OSHA Training Guidelines for Safe Patient Handling
- OSHA 7005 – Public Warehousing and Storage
- OSHA 7100 – Introduction to Machinery and Machine Safeguarding
- OSHA 7105 – Evacuation and Emergency Planning
- OSHA 7110 – Safe Bolting: Principles and Practices
- OSHA 7125 – Seminar on Combustible Dust Hazards
- OSHA 7200 – Bloodborne Pathogens Exposure Control for Healthcare Facilities
- OSHA 7205 – Health Hazard Awareness
- OSHA 7210 – Pandemic Influenza Preparedness
- OSHA 7300 – Understanding OSHA's Permit-Required Confined Space Standard
- OSHA 7400 – Noise Hazards in the Construction Industry
- OSHA 7405 – Fall Hazard Awareness for the Construction Industry
- OSHA 7410 – Managing Excavation Hazards
- OSHA 7415 – Introduction to Safety and Health Management
- OSHA 7500 – Introduction to Safety and Health Management
- OSHA 7505 – Introduction to Accident Investigation
- OSHA 7510 – Introduction to OSHA for Small Businesses
- OSHA 7845 – Recordkeeping Rule Seminar

**Special Deal!**  
**Buy 2 Seminars and get a  
third one FREE!**

for Safety Week 2014 dates.*

## Training Offered Worldwide

Our International Programs team can deliver contract training worldwide in a variety of topic areas that include occupational safety and health, maritime, oil and gas, environmental, healthcare and transportation. By developing customized curriculum to fit the customer's needs, our experienced trainers support foreign governments and the private industry sector by delivering on-site instruction to their workforce. We currently have active projects in Central and South America, Europe and Asia providing best practice and train-the-trainer courses in English and native languages. Interested parties may contact the OSHA Region VI Education Center for further information.

Students are now able to submit OSHA Outreach card requests through the Outreach Portal via our website, **[www.OutreachPortal.com](http://www.OutreachPortal.com)**.

We designed the web-based portal with our instructors in mind to provide a more efficient and reliable process of requesting Outreach cards.

Portal features:

- Student cards will be delivered to the Outreach Trainer preprinted with the Student Name, Trainer Name, and Expiration Date.
- Record keeping and reporting capabilities reduce paperwork and provide a centralized location for all program reports submitted.
- Electronic submissions reduce the amount of administrative work previously associated with submitting paper reports, allowing you more time to focus on your outreach training, as well as allowing us more time to dedicate to providing you with outstanding service.
- Trainers can access the training resources page with training materials for their upcoming classes, such as PowerPoint presentations and handouts within the portal.

For more information on using the Outreach Portal, please contact our office: **866-906-9190 • [outreach@uta.edu](mailto:outreach@uta.edu)**

# REGISTRATION

Registration is currently available online, in person, by phone, fax or mail. Early registration is strongly advised due to the space limitations of many classes. If a course requires prerequisite(s) all documentation MUST be verified prior to attending class.

- Online: [uta.edu/ded](http://uta.edu/ded)
- In Person or by mail: 140 W. Mitchell St. Arlington, TX 76019
- By Phone: (817) 272-2581 OR Toll Free: (866) 906-9190
- By Fax: (817) 272-2556

---

## Student Withdrawal and Transfer Policy

Students have several options available should they need to withdraw from a class. The available options are dependent on when the student withdrawal is made. Please note: All student withdrawal requests must be received via telephone, Monday-Friday during normal business hours.

---

## Discounts

Individuals who need the Update for Outreach Trainers course (OSHA 502 or OSHA 503) can take the full trainer course OSHA 500 or OSHA 501 for the cost of the update class. They will need to provide a copy of their current trainer card before registration.

- 5%: Pay for five registrations at once (either different classes or different registrants) and get Five percent off the open enrollment price.
- Enrollment fees are waived for all OSHA Region VI employees.
- Discounts cannot be applied retroactively to classes already taken or in progress.

---

## Cancellations

UT Arlington reserves the right to change or cancel any class. In the unfortunate event that a class must be changed or cancelled, you will be notified by phone and/or email. You are required to provide a valid e-mail address and phone number to ensure notification. The decision to cancel a class due to insufficient enrollment will be made approximately one to two business days prior to the class start date. In the event that a class for which you have registered is cancelled, you may choose another class or receive a refund in accordance with the UT Arlington, Division for Enterprise Development Refund Policy.

---

## Textbooks

All course materials will be provided on the first class day by UT Arlington unless indicated otherwise. Additional CFRs may be purchased at the following prices: 29 CFR 1910- \$25, 29 CFR 1926 - \$20.
