We are excited to announce the **multiple ways you can participate** in your next training course. Some of these will be quite familiar to you, while others you may have only seen or heard about.

LET'S TAKE A MOMENT TO CLARIFY THE DIFFERENCES:

Face to Face: This is the traditional classroom training typically conducted on-campus or at one of our training facilities. These are live classes offered on-site in a classroom. With this option, you have the benefit of speaking with your instructor and fellow participants face to face, with the greatest opportunity for networking and collaborative work with other participants.

Simulcast: This format is a hybrid option incorporating both the face to face classroom elements and online participation via a live interactive webinar during the scheduled class times. In a simulcast, you will have the option to participate in person on campus or have the live classroom broadcast to you where you

will see the classroom and instructor and can participate via text or voice chat. This method offers flexibility if you choose not to attend on campus, is a great opportunity to be involved in the discussion and allows networking with a live instructor moderating.

Webinar: With this format, the training is conducted entirely in our online classroom using our web conferencing communication and collaboration platform that combines video and chat. You will have access to a virtual classroom where you can chat with your fellow students, download digital copies of the materials, and participate in the live lecture and discussion from the comfort of your home or office.

Note: The start times of individual classes may vary slightly. Please check the website or your registration receipt for the start time of your class.

ADD THREE ADVANCED ETI ELECTIVES

Note: Environmental electives used for the required environmental certification (ERP, ESP, EMP) chosen may not be used toward the Master Certification for the Environmental Professional.

NEW ETI COURSES

MGE 820: Toxic Release Inventory (TRI) Reporting
 MGE 822: Lean Six Sigma for Environmental Professionals

YOUR SAFETY IS OUR FIRST PRIORITY.

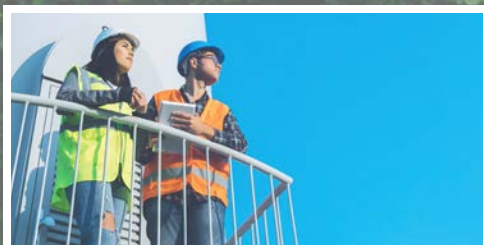

Hybrid: This format is a combination of on-campus face to face instruction with live webinars or online modules. This option provides access to a variety of formats to meet the demands of your schedule and provide instruction either online modules, in-person, live webinars or a combination of the three.

Online: We are happy to announce that ETI's courses are being made available online in a self-paced environment. If you want to take one of our training courses, but you do not have the ability to dedicate a week to training you can simply take the same course online. You will have access to the same materials and content, but will complete the coursework on your own schedule.

SOCIAL DISTANCING PROTOCOLS, FACE MASKS, AND OUR RESPONSE TO COVID-19:

UTA continues to monitor official sources as we plan course instruction and a safe return to classroom instruction. As we return to campus and to our various training centers we will be practicing social distancing to provide the healthiest possible environment for all. At the time of the publication of this catalog, in accordance with The Centers for Disease Control guidelines and state and local orders, The University of Texas at Arlington now requires that everyone wear face masks or coverings in campus buildings, including during classes.

Stay current on this on-going situation by visiting uta.edu/announcements/coronavirus
