ENVIRONMENTAL AUDITS MG.EB.10
Consequences of non-compliance can include increased liability and significant fines and penalties. This course provides participants with an in-depth look at multimedia environmental compliance auditing in all types of organizations in accordance with demonstrated industry techniques and standards of practice. Completion of this course will help improve compliance status, control risks, support environmental management systems, and identify opportunities for pollution prevention. $895

FUNDAMENTALS OF THE CLEAN AIR ACT AIR.201
Provides an overview of the Clean Air Act requirements, including the New Source Review process and Title V permitting. Participants are presented with solutions to manage hazardous air pollutants and criterion pollutants. $750

INTRO TO ENVIRONMENTAL COMPLIANCE ETI.101
This course presents a full overview of EPA environmental regulations and addresses elements of the major environmental programs at the state level. Activities and case studies will be used throughout the course in order for participants to apply the material presented. $895

LEAN SIX SIGMA FOR ENV. PROFESSIONALS MG.EB.22
Through this online course, participants are given the opportunity to develop their skills and comprehension of Lean Six Sigma Principles For Environmental Professionals through focus on progressive techniques and practices in process improvement key concepts, the Lean PDCA process, the Six Sigma and the DMAIC process, and common root cause and failure assessment/prevention methods. $650

RCRA OVERVIEW WST.460
Upon successful completion of this eight (8) hour online course, participants will be provided the basic elements of Resource Conservation and Recovery (RCRA) and waste management compliance. The course includes a history and overview of RCRA and helps participants understand to comply with hazardous waste regulations including identifying hazardous wastes, managing waste at your facility, contain management, how to prepare shipments for transport to treatment, storage and disposal facilities and how to properly keep records for compliance and enforcement. Topics include EPA and state registration requirements, solid and hazardous waste management procedures, hazardous waste determinations, categories of hazardous waste generators, hazardous waste transportation, hazardous waste accumulation methods, container management and procedures, universal waste management procedures, used oil management, and underground storage tanks. $195
