Digital Photography

Our program is designed to teach you the skills and knowledge to become a professional photographer or an enthused hobbyist. Start by exploring the capabilities of your digital camera and then learn the techniques to improve the quality of your photographs. Edit your images so that the finished product is exactly what you imagine by learning Adobe Photoshop, the industry standard photo editor. Courses can be taken individually or for personal enrichment.

Benefits of this Certificate:

- Demonstrate skills & techniques of digital photography in relation to digital capture & image editing
- Learn to apply the features of the digital camera to create the desired image
- Learn to use digital image-editing software and computer skills to create an aesthetic final image
- Utilize effective workflow techniques to increase efficiency
- Apply the proper lighting techniques to enhance digital images

Camera Requirement

Requires a camera with changeable lenses and full manual settings; DSLR, ZLR or advanced Range Finder type digital cameras are acceptable. If you are unsure of your camera, please call our office before registering.

Certificate Requirements

To earn a Certificate in Digital Photography, you must successfully complete all Required courses and 3 electives.
