

## Benefits to Participants of the Certification Programs

- Enhance career advancement opportunities
- Continue professional development in a growing and changing field
- Receive credit for your previous training from any OSHA Education Center across the country
- Transfer this verifiable training from employer to employer
- Increase your awareness of changing government regulations
- Join an elite network of Certified Professionals

## Who Will Benefit?

- Health, Safety, and Environmental Professionals
- Safety Coordinators
- HR Professionals
- Plant Managers, Supervisors, Crew Chiefs
- Construction Site Superintendents
- Safety and Health Training Facilitators
- Public Works Safety Professionals
- Risk Management and Risk Assessment Professionals

## Academic Credit

Academic credit can be made available for many of the courses you take through this OSHA Education Center and our Affiliates. Credits are awarded through an accredited institution and may be applied to your pursuit of an Associate's or Bachelor's degree as institutionally allowed. An admission application and additional fee will be required by the credit-granting institution. These fees vary. To find out more about obtaining college credit for your OSHA training courses, just speak to one of our registration representatives.

## Progressive Certification Program Requirements (4 to 12 courses)

- Concentrations available in Safety & Health, Environmental and Risk Management
- All four certification levels accept a liberal number of courses taken at other OSHA Training Institute Education Centers
- Course completions earned at each level can be applied to more advanced level certificate programs
- No degree required for certification
- No time limit – No application fee to get started
- No Annual CEUs – Just keep your OSHA 500 and/or OSHA 501 current

## Why Become Certified?

- Recognizes commitment and dedication to your profession
- Reflects a high level of professionalism across all aspects of your career
- Acknowledges national industry standard of skill competence in the fields of safety, health, environmental and risk management
- Accepted criteria for promotion or career advancement
- Provides you with appropriate credentials to teach and lead others
- Create a safer work environment for you and your co-workers

### Transferable Knowledge

The Region VI OSHA Education Center honors the work of other OSHA Education Centers across the country by recognizing their training and credentialing programs. If you are pursuing a credentialing program with any other OSHA Education Center, the Region VI OSHA Education Center at The University of Texas at Arlington will grant an equivalent credential. Simply notify us of the credential you seek, provide confirmation of your previously completed training and take at least two training courses through the UT Arlington, Region VI OSHA Education Center.

Detailed descriptions for each certification program, listings of required courses, and open enrollment class dates, locations and fees are available at:
